Mrs. Beatrice Weaver  
1253 Harllees Bridge Road  
Dillon, South Carolina 29536

Dear Mrs. Weaver:

It has come to my attention that the vegetation at the back of your property has again grown up to a point that our contract meter readers are unable to safely access your property through the rear gate, nor are they able to get to the meter on the barn at the back of your property (account number 074-900-1889). As a result, we have had to estimate meter readings for this account for the bills rendered in June and July, 2005, and will have to continue to do so until the vegetation is cut down.

I note that in your letter of September 5, 2004 to the South Carolina Public Service Commission relative to Progress Energy's right of access your property, you stated that you would be responsive to "a simple request to cut the grass." I am therefore requesting by means of this letter that you clear the access route to the rear gate, including the paths leading to your two metered accounts, and that you also clear the vegetation from the area surrounding the meter on the barn. We appreciate your cooperation in this matter.

Sincerely,

Gregory A. Cagle  
Senior Regulatory Analyst
